

The Traveler's Arrangements: National and International

Patients can make travel arrangements as easy as a click of the mouse on the computer to meet with Dr. Stuart Linder, world renown Beverly Hills Body Sculpting Specialist. Patients travel throughout the year from within the United States as well as international to have surgery with Dr. Linder and it will be our pleasure to take care of your traveling needs. Whether you're considering breast enhancement, breast lift, breast reduction or body sculpting, including abdominoplasties, tummy tucks or liposuctioning of the body, we can make your stay the most pleasant one possible here in the heart of Beverly Hills.

The most beautiful hotels for your convenience and comfort are available here in Beverly Hills. Nearby attractions, including Hollywood's finest can make your plastic surgery transformation into a complete package vacation. Most patients will fly in through the Los Angeles International Airport and travel a short distance to the heart of Beverly Hills to have their bodies sculpted. We're here to take care of your every need.

Personal Information Forms and Demographic Information

1. We welcome patients to submit photographs by the internet as well as fill out patient information sheets or forms so that we may help to evaluate your situation in terms of candidacy for specific plastic procedure of the body. Some patients will not be candidates for certain operations and therefore traveling a long distance may be completely unnecessary. We want to make your initial consultation as convenient and comfortable as possible. Once your photographs and information clinically have been reviewed by Dr. Stuart Linder, we will contact you either by email or telephone, as per your request as to whether you are a candidate for the specific operation.

2. For those who are excellent candidates for specific surgeries, we will help set up your preoperative consultation and clinical examination as well as hotel arrangements if necessary.

3. Once you have decided to schedule your surgery, a patient consultation will determine specific available dates as well as postoperative recovery facility and/or hotel arrangements as necessary. Patients normally undergo their surgery at our Medicare State Licensed Ambulatory facility at the Brighton Surgical Center, located in the same building, lower level as our office, 9675 Brighton Way, Suite 420, Beverly Hills, CA 90210.

4. Postoperative Care. It is certainly expected that patients will be instructed to stay within the Beverly Hills area for up to 14 days, depending upon their specific operations and healing time. Obviously, patients having more involved surgeries such as abdominoplasties and/or breast reductions would require longer periods of postoperative care and seen for an extended period of time in

the Los Angeles area rather than a patient who may have a small liposuction procedure. This will be dependent upon your specific situation.

5. Your medical care and health is our utmost concern. As a result, patients with any type of systemic medical conditions, i.e., high blood pressure, diabetes anemia, and asthma, will be fully worked up by one of our excellent internists here either at Cedars-Sinai Medical Center or Century City Hospital prior to your surgery.

We very much look forward to hearing from you and expect that your travels to Beverly Hills will be the most fruitful, allowing for wonderful transformation of both your body and your spirits.
