THE TRUTH ABOUT PLASTIC SURGERY

DR. STUART A. LINDER
Beverly Hills Plastic Surgeon

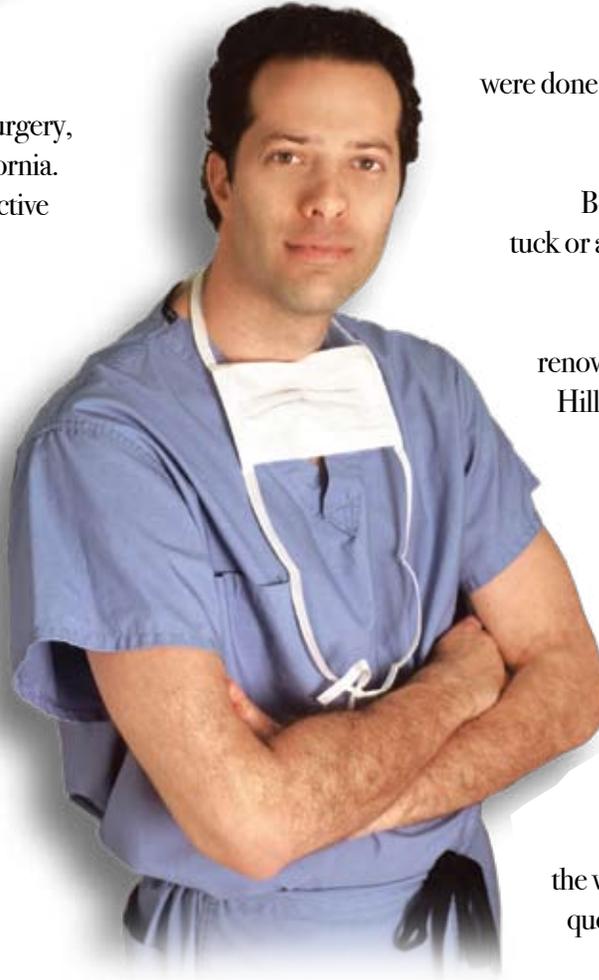

THE BEVERLY HILLS *Shape*

Dr. Stuart Linder, Diplomate of the American Board of Plastic Surgery, specializes in body sculpting procedures in the heart of Beverly Hills, California. Dr. Linder has trained in general surgery as well as plastic and reconstructive surgery and graduated from the UCLA School of Medicine.

He has performed thousands of body sculpting procedures, emphasizing breast augmentations, breast lifts, breast reductions, body contour, liposuctions and abdominoplasty procedures. He is world renown for his work and body sculpting procedures which appear in a variety of television documentaries, educating the public in cosmetic surgery procedures of the body.

He stresses safety and the predictability of the surgery for each and every patient's needs. "The Truth About Plastic Surgery" was written in order to help the patient, female or male, make an educated decision when considering plastic surgery. The intention of this book is to educate the public as to qualifications of surgeons, their backgrounds, experience and assist patients in their expectations for realistic results.

Throughout this book, discussions are made on the specific procedures on body sculpting which he performs on patients of all walks of life, including Hollywood's rich and famous.

"The patient must understand that having cosmetic surgery is in no way like buying a new pair of designer shoes or a brand-new luxury automobile. If you buy one of those products and it is defective, you can usually return it and get your money back. This is not so with cosmetic surgery. If you have horrible damage done to your body, this damage may be irreversible, and unfortunately, it cannot be returned."

–Dr. Stuart A. Linder
Author of *The Beverly Hills Shape*

More than 10 million plastic surgery procedures were done in the U.S. in 2005 – but not everyone was happy with the outcome.

Before you consider going under the knife for a nip, tuck or a completely new look, you must do your research.

That's the message from Dr. Stuart A. Linder, the renowned plastic surgeon whose new book *The Beverly Hills Shape*, is a must-read for anyone considering the procedure.

Dr. Linder discusses topics including the psychological ups and downs of plastic surgery, reminding readers that surgery doesn't fix emotional problems. He guides the reader on how to choose a surgeon, what to look for and who to run from.

The Beverly Hills Shape is an essential read before making a decision to change the way you look. Its A-Z format includes a checklist of questions to ask a doctor, a post-operative worksheet to keep for your records and a glossary of terms.
